

HAB TAXI Company ERD Project

Final Sprint • Group 2

A decorative graphic consisting of several parallel orange lines. It starts as a horizontal line on the left, then angles downwards to the right, and finally becomes horizontal again on the right side.

HAB TAXI Company Entity-Relationship Diagram • Group 2

HAB Taxi Company Entity–Relationship Diagram (Group 2)

New Features

- 1) The **Profit Listing** table is dependent on the **Revenue** table and **Expenses** table. It shows the end date needed to generate Driver Financial Listing and profit(loss) recorded by the company.
- 2) A **Vehicle** table was added to the ERD so as to more concretely establish some finer details of the company's operations. As such, Vehicle was also added as a foreign key to the **Driver** table.
- 3) A **Ride** table was also added to the mix, which we believe to be an important addition as rides and the transactions thereof are central to any taxi business. The **Ride** table thus provides further details and information to the **Revenue** and **Pro listing** tables.
